Needs attention first

• NEEDS ATTENTION / Reject (Medium confidence): pyinvoke/invoke#1053: fix: Buffer overflow in bytes_to_read, tested against its own tests. Probe: 1 observation(s) need attention: c1.tty_exception does not differ although the claim says it does (C1); probe model-p1 has no measured line coverage (no coverage data); it does not count as covering the change; tests: 1 test(s) fail on main and pass on the PR; 191 test(s) ran on main, 191 on the PR; 0 new test(s) pass, 83 unchanged (5 of them skipped on both sides); 112 test failure(s) pre-existing and identical on both sides; Limitation: tests/runners.py::Runner_::warn::honors_config, tests/runners.py::Runner_::warn::kwarg_beats_config, tests/runners.py::Runner_::warn::does_not_apply_to_watcher_errors, tests/runners.py::Runner_::warn::does_not_apply_to_timeout_errors, tests/runners.py::Runner_::hide::honors_config, tests/runners.py::Runner_::hide::kwarg_beats_config, tests/runners.py::Runner_::pty::pty_defaults_to_off, tests/runners.py::Runner_::pty::honors_config (+104 more) did not run on the base. They are not a new pass, and this result does not cover them.. Open report (PDF)

• COULD NOT VERIFY / Re-run (Low confidence): python-attrs/attrs#1657: Add attrs.fields_equal() for class-agnostic field comparison, tested against its own tests. Not verified: no AI-written probe ran any changed line, so the change itself was not exercised by a probe; 8 test(s) fail on main and pass on the PR; 192 test(s) ran on main, 192 on the PR; 0 new test(s) pass, 186 unchanged (2 of them skipped on both sides). Open report (PDF)

• COULD NOT VERIFY / Re-run (Low confidence): pytest-dev/pytest#15380: Fix INTERNALERROR in --fixtures when two fixture defs share a sort key, tested against its own tests. Tests produced no results on both sides (collection failed; see pytest logs); probe model-probe1 is not_adequate (ran none of the 1 changed line(s) on the main side); its results do not count either way. Open report (PDF)

• COULD NOT VERIFY / Re-run (Low confidence): urllib3/urllib3#5377: Count bytes consumed by chunked response streaming, tested against its own tests. Not verified: no AI-written probe ran any changed line, so the change itself was not exercised by a probe; 13 test(s) fail on main and pass on the PR; 211 test(s) ran on main, 211 on the PR; 0 new test(s) pass, 245 unchanged (47 of them skipped on both sides). Open report (PDF)

• VERIFIED / Approve with notes (High confidence): mahmoud/boltons#757: Preserve required fields in repr helpers, tested against its own tests. 2 test(s) fail on main and pass on the PR; 48 test(s) ran on main, 48 on the PR; 0 new test(s) pass, 46 unchanged; probe: 5 observation(s) ignored as noise (they change between runs of the same side); probe: 2 unchanged sub-check(s) of an input where the claim's change was seen, shown as advisory only: c2.exp_repr_optional_only (C2); c4.exp_repr_optional_only (C4); probe: claim(s) C1, C2, C3, C4 proven. Verdict meanings

| Verdict | Meaning

| NEEDS ATTENTION | The run is trustworthy and found a problem: breaks, import failures, or a false claim.

| COULD NOT VERIFY | The run failed its own trust checks or the evals (no conclusion; re-run after fixing), or, for PR runs, the tests never exercised the changed code (review by hand).

| VERIFIED | The run is trustworthy and found no behavior change.
