SUMMARY

Proof-of-Change go/no-go: 2026-11-09 on ef12096

4 report(s) in this folder: 2 need attention, 2 could not be verified, 0 verified. Built from every record.json stored in this folder, so a later one-PR run cannot narrow it.

Needs a decision first

- **NEEDS ATTENTION**: mahmoud/boltons#744: Limit complement_int_list traversal to the requested window. Probe: 2 observation(s) need attention: c1.output differs although the claim says it does not (C1); c3.output differs although the claim says it does not (C3); probe: 1 observation(s) ignored as noise (they change between runs of the same side); probe model-probe1 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count; tests: 1 test(s) fail on main and pass on the PR; 47 test(s) ran on main, 47 on the PR; 0 new test(s) pass, 46 unchanged

- **NEEDS ATTENTION**: pyinvoke/invoke#1099: Use explicit re-exports for mypy strict mode. Probe: 1 observation(s) need attention: c5.test_file_exists does not differ although the claim says it does (C5); probe model-p1 has no measured line coverage (no coverage data); it does not count as covering the change; tests: 32 test(s) fail on main and pass on the PR; 204 test(s) ran on main, 204 on the PR; 0 new test(s) pass, 165 unchanged (1 of them skipped on both sides); 8 test failure(s) pre-existing and identical on both sides

- **COULD NOT VERIFY**: mahmoud/boltons#743: Keep inferred fields in headerless table factories. Not verified: no AI-written probe ran any changed line, so the change itself was not exercised by a probe; 4 test(s) fail on main and pass on the PR; 14 test(s) ran on main, 17 on the PR; 3 new test(s) pass, 10 unchanged

- **COULD NOT VERIFY**: mahmoud/boltons#746: Restore disabled GC state on context exit. Could not verify: claim(s) C1, C4 expect a difference but no observation matches (1 test(s) fail on main and pass on the PR; 5 test(s) ran on main, 5 on the PR; 0 new test(s) pass, 4 unchanged; probe model-probe1 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count; probe model-probe2 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count; probe model-probe3 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count)

All reports

| Verdict | Subject | Why | Report |

|---|---|---|---|

| NEEDS ATTENTION | mahmoud/boltons#744: Limit complement_int_list traversal to the requested window | Probe: 2 observation(s) need attention: c1.output differs although the claim says it does not (C1); c3.output differs although the claim says it does not (C3); probe: 1 observation(s) ignored as noise (they change between runs of the same side); probe model-probe1 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count; tests: 1 test(s) fail on main and pass on the PR; 47 test(s) ran on main, 47 on the PR; 0 new test(s) pass, 46 unchanged | [PDF](boltons-744/REPORT.pdf) |

| NEEDS ATTENTION | pyinvoke/invoke#1099: Use explicit re-exports for mypy strict mode | Probe: 1 observation(s) need attention: c5.test_file_exists does not differ although the claim says it does (C5); probe model-p1 has no measured line coverage (no coverage data); it does not count as covering the change; tests: 32 test(s) fail on main and pass on the PR; 204 test(s) ran on main, 204 on the PR; 0 new test(s) pass, 165 unchanged (1 of them skipped on both sides); 8 test failure(s) pre-existing and identical on both sides | [PDF](invoke-1099/REPORT.pdf) |

| COULD NOT VERIFY | mahmoud/boltons#743: Keep inferred fields in headerless table factories | Not verified: no AI-written probe ran any changed line, so the change itself was not exercised by a probe; 4 test(s) fail on main and pass on the PR; 14 test(s) ran on main, 17 on the PR; 3 new test(s) pass, 10 unchanged | [PDF](boltons-743/REPORT.pdf) |

| COULD NOT VERIFY | mahmoud/boltons#746: Restore disabled GC state on context exit | Could not verify: claim(s) C1, C4 expect a difference but no observation matches (1 test(s) fail on main and pass on the PR; 5 test(s) ran on main, 5 on the PR; 0 new test(s) pass, 4 unchanged; probe model-probe1 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count; probe model-probe2 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count; probe model-probe3 is not_adequate (the probe crashed or printed no parsed output on every main-side run; not counted as ran or adequate); its matching results do not count) | [PDF](boltons-746/REPORT.pdf) |
