Reviewer report: pallets/markupsafe#438: implement speedups with rust v2
Run markupsafe-438, tested 2026-11-04 14:38 IST by ops/daily_run.py (route source-pair).
Proof-of-Change
commit 985a7eade681b1d88256d5a185e129da53855144. Report generated 2026-11-05 11:47 IST by
reports/pr_report.py.
Baseline: full (test comparison + claim probes + coverage gate + claim flagging (differential probes
shown,
informational)).
COULD NOT VERIFY
Recommended action: Re-run Confidence: Low
The run did not produce a usable comparison, so there is no conclusion about the PR. The run did
not finish
cleanly, so it says nothing about the PR.
Advice only: Proof-of-Change never blocks a merge and never posts on GitHub.

Summary in plain English
? What it says it does: implement speedups with rust v2 (pallets/markupsafe#438).
? What we observed: could not verify: claim(s) C3, C4, C5, C6 (+1 more) expect a difference but no
observation
matches (26 test(s) ran on main, 26 on the PR; 0 new test(s) pass, 26 unchanged; probe: 1 difference(s) no
linked claim covers, shown as advisory only: c1.error; probe: 1 observation(s) shown as advisory
only (claim not
shown on these inputs; a related change was proven): c2.rust_in_output (C2); probe: claim(s) C1 proven; probe
model-probe-b has no measured line coverage (coverage produced no data (exit 0); see probe-coverage.log); it
does not count as covering the change).
? What you should do: Do not decide yet. Fix the problem under ’How to fix’ and run the check again.

Demo helper
These notes are background from the console and the daily check. They do not change the verdict.
If setup fails, the helper retries the install up to 2 times. If a test still can’t be verified because
something is

missing or fails to import, it looks up the cause, installs the fix on both sides and reruns that step, up
to 3 tries.
? Setup check: GitHub token: present.
? Setup check: Nebius token: present.
