Reviewer report: pallets/markupsafe#512: Add support for t-strings
Run markupsafe-512, tested 2026-11-04 12:45 IST by ops/daily_run.py (route source-pair).
Proof-of-Change
commit 985a7eade681b1d88256d5a185e129da53855144. Report generated 2026-11-05 11:47 IST by
reports/pr_report.py.
Baseline: full (test comparison + claim probes + coverage gate + claim flagging (differential probes
shown,
informational)).
NEEDS ATTENTION
Recommended action: Reject Confidence: High
The run is trustworthy and found a difference a person should look at. Every check passed and every claim cites
a log line.
Advice only: Proof-of-Change never blocks a merge and never posts on GitHub.

Summary in plain English
? What it says it does: Add support for t-strings (pallets/markupsafe#512).
? What we observed: probe: 3 observation(s) need attention: c1.markup_vs_expected does not differ although
the claim says it does (C1); c2.escape_instance does not differ although the claim says it does (C2);
c2.markup_instance does not differ although the claim says it does (C2); probe: claim(s) C4 proven;
probe
model-p2 is uninformative (uninformative: every observation is probe-broken (the same exception or skip value
on both sides)); its matching results do not count; tests: 6 new test(s) skipped on the PR (they did
not exist
before; listed, not a finding); 1 test(s) re-parametrized (4 -> 4 ids); 76 test(s) ran on main, 76 on the
PR; 4 new
test(s) pass, 72 unchanged.
? What you should do: Do not approve as is. Read 'What changed in behavior' and decide with the PR author.

Demo helper
These notes are background from the console and the daily check. They do not change the verdict.

If setup fails, the helper retries the install up to 2 times. If a test still can't be verified because
something is
missing or fails to import, it looks up the cause, installs the fix on both sides and reruns that step, up
to 3 tries.
