Reviewer report: andialbrecht/sqlparse#884:
identifier_case: keep the case of backtick-, acute- and bracket-quoted identifiers
Run sqlparse-884, tested 2026-11-05 11:29 IST by ops/daily_run.py (route source-pair).
Proof-of-Change
commit 985a7eade681b1d88256d5a185e129da53855144. Report generated 2026-11-05 11:47 IST by
reports/pr_report.py.
Baseline: full (test comparison + claim probes + coverage gate + claim flagging (differential probes
shown,
informational)).
NEEDS ATTENTION
Recommended action: Reject Confidence: High
The run is trustworthy and found a difference a person should look at. Every check passed and every claim cites
a log line.
Advice only: Proof-of-Change never blocks a merge and never posts on GitHub.

Summary in plain English
? What it says it does: identifier_case: keep the case of backtick-, acute- and bracket-quoted identifiers
(andialbrecht/sqlparse#884).
? What we observed: probe: 5 observation(s) need attention: c2.acute_no_ws.upper does not differ
although the
claim says it does (C2); c2.acute_ws.upper does not differ although the claim says it does (C2);
c2.dq_no_ws.upper does not differ although the claim says it does (C2); c2.dq_ws.upper does not differ although
the claim says it does (C2); probe: claim(s) C2 proven; probe model-p-c3 has no measured line coverage
(coverage produced no data (exit 0); see probe-coverage.log); it does not count as covering the change; probe
model-p-c4 has no measured line coverage (coverage produced no data (exit 0); see probe-coverage.log); it
does not count as covering the change; tests: 9 test(s) fail on main and pass on the PR; 181 test(s)
ran on main,
181 on the PR; 0 new test(s) pass, 174 unchanged (2 of them skipped on both sides).
? What you should do: Do not approve as is. Read 'What changed in behavior' and decide with the PR author.

Demo helper
These notes are background from the console and the daily check. They do not change the verdict.
If setup fails, the helper retries the install up to 2 times. If a test still can't be verified because
something is
missing or fails to import, it looks up the cause, installs the fix on both sides and reruns that step, up
